

Powertrain TVN Series

TVN Series are typically designed for engine motorcycle chassis in order to upgrade from engine to electrical system easily. Using gearbox compatible with electromotor give more higher torque in lower gears. Efficiency of all system in different torque and speed stay in highest state. TVN Series passed all standard test for using in real situation. TVN Series have tested more than 10,000 Km on the road. All main parts are designed by Nemamotor engineering team.

Specification

Electrical Data	TVN300	Unit
<i>Rated Voltage</i>	<i>60</i>	<i>V</i>
<i>Max Output Torque</i>	<i>56</i>	<i>N.m</i>
<i>Max Output Power</i>	<i>4200</i>	<i>Watt</i>
<i>Rated Power</i>	<i>3000</i>	<i>Watt</i>
<i>Efficiency</i>	<i>90</i>	<i>%</i>

Key Features

- Enhancement of efficiency
- Replaceable with Engine for motorcycle
- Motor and Battery Intelligent Control
- Speed Control Mode
- Boost Mode System
- Intelligent diagnostic System
- Equipped with Gear Sensor
- Electromagnetic Standard: ISIRI 4126
- Safety Standard: ISIRI 19101

Accessories

- Lithium Battery
- DC / DC Module
- Charger
